Symantec VIP Access helps protect your online accounts and transactions by using a strong authentication process when you sign in to your VIP-enabled accounts.. symantec.com/Features/Strong-Authentication/VIP-Access adds strong authentication to your normal login in one of the following ways:

- Dynamically generate a one-time use security code on your mobile device.

And it has a benefit over using Rules to move messages into a folder: because you aren't changing the location of the messages, you don't have to search multiple locations to find the message you're looking for.. You can generate a security code even if you do not have a network or mobile connection.
